

Lean Six Sigma Black Belt Refresher Public Training

What is Black Belt Refresher training?

Lean Six Sigma Black Belt Refresher training (also known as—"Rusty Sigma") is a five day open course aimed at those who have been previously trained as a Six Sigma Black Belt but who need to bring themselves back to an appropriate level.

Maybe you fit one of these categories:

- Trained as a Black Belt but limited opportunity to use the tools
- Trained so long ago you can't remember all you were taught
- Worked as a Black Belt then moved to another position — need to hone your skills for your next career move
- Poorly trained first time round — Black Belt was really a shade of Green

This course aims to rekindle memories of Black Belt training and help each candidate reach a level where they can begin practising again.

About us

Paloma Consulting Limited is a specialist provider of Six Sigma Black Belt training. We aim to deliver rapid returns on investment and position Black Belts to be self sufficient internal consultants. A selection of project overviews, along with our Six Sigma project e-mail review brochure, Black Belt support brochure and Black Belt certification brochure can be viewed by visiting our web site.

Why attend "Refresher" Training?

The course will put you back on track as a Six Sigma Black Belt.

Maybe you have Six Sigma Black Belt on your resume—what if you were asked to recall some of the tools and techniques?

Maybe in a new role you may be asked to apply some of your knowledge as a Black Belt to solve a problem or train others

Are you in the job market? — are you concerned about stating your Lean Six Sigma experience in your resume in case you are challenged on it?

This interactive course is focused on ensuring each attendee reaches the correct outcome, by tailoring each separate course at the outset to match the requirements of each individual participant .

What's included?

Typical course content is shown overleaf.

Courses are non residential and all prices are per delegate and exclude VAT. Overnight accommodation is NOT included in the price.

The statistical analysis during the courses is usually carried out using MINITAB™ Statistical Software. Delegates are required to bring a laptop loaded with Microsoft Excel, Microsoft Word, Microsoft PowerPoint and MINITAB™ to the training. For the course temporary evaluation copies of Minitab can be provided. Delegates will need to obtain a full license version for future use.

To ensure maximum effectiveness of training, the number of delegates is limited to 12 per course.

This course is NOT:

- A quick route to becoming a Black Belt—this course will NOT allow you to bypass the normal 4 weeks of Black Belt training.
- A route from Green to Black Belt (for this see our brochure “Green Belt to Black Belt conversion training”).
- A quick route to certification—if required we can assist in project support to help achieve Black Belt certification—see below

Certification

Certification of Black Belts is available upon completion of Black Belt training, 2 successfully completed projects with targeted savings, both projects formally written in a report to demonstrate tools and methodology knowledge (including at least one DOE). Further information is available on request or by downloading the certification brochure from our website.

Lean Six Sigma Public Courses - Terms & Conditions

Course Booking

Course bookings may **provisionally** be made by contacting Paloma Consulting Limited via telephone, email or fax.

Fees

Upon receipt of a provisional booking, an invoice will be issued. A deposit of at least 20% of the total invoice must be paid within 14 days of the invoice date to reserve a place on the course. The delegate's place on the course is not confirmed until the remaining balance of the invoice has been received and cleared, at least 3 weeks prior to the start of the course.

Please note if the booking is made less than 4 weeks prior to the course then the full amount will be requested in one payment. Invoices will be sent electronically by email unless an alternative method is requested.

The course fee is exclusive of VAT and any other applicable taxes.

The fee covers tuition, course materials and documentation and excludes any overnight accommodation or transportation which will be the responsibility of the delegate.

Payment of the course may be made by Cheque, BACS or Direct Bank Transfer. Full payment details will be provided on the invoice.

By confirming attendance with full payment the delegate is deemed to have read and accepted the terms and conditions detailed here in full, and accepted the cancellation policy detailed below.

Cancellation Policy

Cancellations must be made in writing and at least 4 weeks prior to the commencement of the course.

Any cancellations that are made between 4 - 8 weeks prior to the commencement of the course will have a full refund less 10% of the **total** invoice amount.

No refund will be available if the cancellation is made after 4 weeks prior to the commencement of the course.

Paloma Consulting Limited reserves the right to cancel any training session for any reason by notifying delegates of such cancellation prior to the beginning of the training; in which case fees will be fully refunded.

In the event of a cancellation arising from events outside our control, including adverse weather conditions or industrial action, an alternative date will be provided. In such circumstances Paloma Consulting Limited will not offer any refunds.

A Company may substitute a named delegate up to one week prior to the first session of training by giving notice of the substitution in writing. Substitutions **cannot** be made once the training programme has commenced.

Typical Course Content

The course begins with a familiarisation session to understand each individual's current level of understanding. This session will determine the exact content of the course.

Topics covered would typically include:

- Overview of DMAIC
- Defining the problem
- Measurement Systems Analysis
- Capability Analysis
- Cause & Effect Analysis
- Hypothesis Testing
- Design of Experiments
- Control Plans
- Control Charting
